Summary

Information Technology student (3rd term, GPA 3.70/4.00) building production systems: a self-hosted Kubernetes platform (Flux, OpenTofu, OpenBao), Rust and Go backends, and full-stack web applications. Seeking a DevOps or backend internship or junior role — remote or on-site in Batam.

Skills

Languages: Rust, Go, Python, TypeScript, JavaScript, PHP, Kotlin, SQL, Bash

Backend: Axum, Chi, Express, Apollo GraphQL, Laravel, REST APIs, GraphQL

DevOps & Infrastructure: Linux, Docker, Podman, Kubernetes (k3s), Flux CD (GitOps), OpenTofu, OpenBao, Woodpecker CI, GitHub Actions, Cloudflare (Tunnel, DNS), WireGuard/NetBird, KVM/libvirt, Grafana, VictoriaMetrics

Databases: MySQL, MongoDB, SQLite

Experience

Web & Infrastructure Developer (Volunteer) — INTI Kepri (Indonesian Chinese Association) *Sep 2025 – Present*
Batam, Indonesia

- Build and operate the CMS and platform behind intikepri.com: a Rust (Axum) CMS with OpenBao-issued Ed25519 JWTs, MySQL/SQLite persistence, and the static-site build pipeline (frontend design and SEO co-developed with a collaborator).
- Deploy and run the services on a self-hosted k3s cluster delivered as GitOps: OpenTofu for Cloudflare DNS and tunnel, Flux CD for reconciliation, Woodpecker CI for builds.

Freelance Full-Stack Developer — Maha Giri Buddha Temple

Aug 2026 – Sep 2026

Batam, Indonesia

- Built a headless CMS (Laravel 13, Filament, versioned JSON:API) and a Next.js static website consuming it.
- Delivered the source code and deployment setup to the temple's IT team for continued development.

Event Operations & Sound Technician (Freelance) — Community and cultural events

2023 – 2025

Batam, Indonesia

Projects

kudofools-infra

2026 – Present

Self-hosted Kubernetes platform — single-node k3s on a Raspberry Pi 5 plus a Vultr VPS

- Delivers 10+ services with GitOps: Flux CD, OpenTofu controllers, OpenBao secrets via External Secrets, Woodpecker CI with BuildKit, and a private Zot registry.
- Runs Forgejo, Matrix (Conduit + Element), Vaultwarden, and a WireGuard/NetBird mesh; observability with VictoriaMetrics, VictoriaLogs, Grafana, and alerts bridged to Matrix.

pendaftaran-uib

Feb 2026 – Jun 2026

University registration system — team of 4; primary developer (about 146 of 238 commits)

- Full-stack: Next.js 16/React 19 frontend, Go (Chi) REST API, MySQL with migrations, and MongoDB-backed JWT revocation.
- Security and operations: encrypted NIK fields, Cloudflare Turnstile verification, ClamAV scanning of uploads; Docker/Podman Compose for the whole stack.

statistical-gadget-use

Sep 2026

Reproducible statistics pipeline and research paper (team project)

- Python pipeline (uv, Polars, SciPy, Matplotlib) computing descriptives, Cronbach's alpha, Pearson correlation, regression, t/F tests, normality, and probabilities, locked by 25 tests; generated all figures and LaTeX macros for the co-authored paper.

Education

Bachelor of Information Technology — Universitas Internasional Batam

2025 – Expected 2029

Batam, Indonesia

GPA: 3.70/4.00 (term 1: 3.68, term 2: 3.72). Coursework: Programming, Databases, Networks, Computer Architecture, HCI, Cybersecurity.

Certifications

- **Cisco Networking Academy (2024–2026):** Networking Basics; Introduction to Cybersecurity; Python Essentials 1 & 2; JavaScript Essentials 1 & 2; HTML & CSS Essentials; Linux Essentials and Linux Unhatched.
- **KodeKloud (2026):** Docker Training Course for the Absolute Beginner; Crash Course: Docker for Absolute Beginners; Crash Course: Linux for Absolute Beginners.

Languages

Indonesian: native · **English:** professional (TOEIC 920) · **Mandarin:** HSK 4 · **Japanese:** A1 (kana, basic kanji)
